

Young Living Diffusers

Diffused oils alter the structure of molecules that create odors, rather than just masking them. They also increase oxygen availability, produce negative ions, and release natural ozone. Many essential oils such as lemongrass, orange, grapefruit, *Eucalyptus globulus*, tea tree, lavender, frankincense, and lemon, along with essential oil blends (Purification® and Thieves®), are extremely effective for eliminating and destroying airborne germs and bacteria.

Diffuser with Glass Nebulizer & Pump

A cold-air diffuser is designed to atomize a microfine mist of essential oils into the air, where they can remain suspended for several hours. Unlike aroma lamps or candles, a diffuser disperses essential oils without heating or burning, which can render the oil therapeutically less beneficial and even create toxic compounds. Burned oils may become carcinogenic. Research shows cold air diffusing certain oils may:

- Reduce bacteria, fungus, mold and unpleasant odors.
- Relax the body, relieve tension, and clear the mind.
- Create an atmosphere of peace and harmony.
- Help with weight management.
- Improve concentration, alertness, and mental clarity.
- Stimulate neurotransmitters.
- Stimulate secretion of endorphins.
- Stimulate growth hormone production and receptivity.
- Improve the secretion of IgA antibodies that fight Candida.
- Improve digestive function.
- Improve hormonal balance.
- Relieve headaches.
- Improve immune health and create a feeling of balance and well-being.
- Reduce bacteria, fungus, and mold.

TIPS:

- Do not use more than one blend at a time in a diffuser as this may alter the smell and the therapeutic benefit. However, a single oil may be added to a blend when diffusing.
- Always wash the diffuser before using a different oil blend. Use alcohol, natural soap and warm water.

Aria™ Ultrasonic Diffuser

Young Living's Aria™ Ultrasonic Diffuser is a unique, stylish way to bring the benefits of essential oils into your home or workplace. This system combines the latest in diffuser technology with a variety of useful features. The included remote lets you choose from a selection of soothing, built-in sounds or enjoy the multicolored LED lights. With the built-in speakers, you can plug in your own personal music device and enjoy the music of your choice. The Aria is made of more natural materials and also boasts a built-in music system to increase its relaxing qualities. The Aria diffuses well in an average-sized bedroom or kitchen (200 to 300 square feet) depending on the amount of essential oil used.

Therapeutic Value: In general, the more essential oil put in the air, the more therapeutic benefits the user will experience; if less oil is used, fewer therapeutic benefits will be present. For the strongest therapeutic experience, use a diffuser that doesn't utilize water, such as Young Living's TheraPro™ Atomizing Diffuser.

TheraPro™ Atomizing Diffuser

Enjoy the ultimate therapeutic experience and the most advanced diffuser technology with Young Living's TheraPro™ Premium Diffuser. This atomizing diffuser features durable, high-quality components that will stand up to repeated use in any environment and is the ideal way to experience the healing benefits of Young Living essential oils. It includes a free 15 ml bottle of Thieves essential oil.

What Makes This Product Unique?

- + Directional control spout and sound reducer.
- + Revolutionary nebulizer technology atomizes a micro-fine essential oil vapor of approximately one to three microns.
- + Young Living essential oil bottles attach directly to diffuser for less mess.
- + 15 ml capacity for long-lasting diffusing.
- + Adjustable on and off time cycles up to twenty minutes.
- + Pressure can also be set up and down for desired oil volume.
- + The TheraPro can cover a very large room (between 600 and 800 square feet). If used in a smaller room, simply turn down the air pressure.

The TheraPro's atomizing technology turns the oil into micro-sized particles that enter the air more quickly, giving the body immediate therapeutic benefits. Young Living essential oil bottles attach directly to the diffuser, eliminating mess and clean-up. For long-lasting therapy, a built-in timer diffuses essential oils on and off for up to twenty minutes.

Home Diffuser

Young Living's Home Diffuser is a state-of-the-art essential oil atomizer that combines the latest in diffuser technology with increased usability. By breaking up a mixture of water and essential oil into millions of micro-particles, the Home Diffuser disperses an aromatic mist into the air, activating the beneficial constituents found in Young Living Therapeutic Grade™ essential oils.

The diffuser comes complete with continuous and internal timer settings and the option to enjoy its soothing light system. Ideal for diffusing any of your favorite essential oils, it's the perfect addition to any room in your home. Depending on which essential oil is being used, the aroma from the Home Diffuser will fill a 700-square-foot area.

My diffusers of choice are the nebulizer glass diffuser or the TheraPro™ Atomizing diffuser as they work on all levels: emotional, physical and tranquility. In dry areas the Aria Ultrasonic and Home Diffusers may help with adding humidity to your environment.
