

## Young Living Diffusers

Diffused oils alter the structure of molecules that create odors, rather than just masking them. They also increase oxygen availability, produce negative ions, and release natural ozone. Many essential oils such as lemongrass, orange, grapefruit, *Eucalyptus globulus*, tea tree, lavender, frankincense, and lemon, along with essential oil blends (Purification® and Thieves®), are extremely effective for eliminating and destroying airborne germs and bacteria.

Item #4495

### TheraPro Premium Diffuser

Enjoy the ultimate therapeutic experience with the most advanced diffuser technology with Young Living's TheraPro Premium Diffuser. This atomizing diffuser nebulizes essential oils and disperses them into the air in an ultrafine mist for concentrated therapy, and is the ideal way to experience the benefits of Young Living essential oils.

The TheraPro atomizing technology turns the oil into micro-sized particles that enter the air more quickly. Young Living essential oil bottles attach directly to the diffuser, eliminating mess and clean-up. For long-lasting therapy, a built-in timer diffuses essential oils on and off for up to twenty minutes.

### Essential Oil Diffuser with Glass Nebulizer & Pump

The Essential Oil Diffuser releases large amounts of oil into the air as a microfine vapor. The oils are diffused without being heated to retain their maximum potency. Unlike aroma lamps or candles, a diffuser disperses essential oils without heating or burning, which can render the oil therapeutically less beneficial and even create toxic compounds. Burned oils may become carcinogenic. Research shows cold air diffusing certain oils may:

- Reduce bacteria, fungus, mold and unpleasant odors.
- Relax the body, relieve tension, and clear the mind.
- Create an atmosphere of peace and harmony.
- Relieve headaches.
- Help with weight management.
- Improve concentration, alertness, and mental clarity.
- Stimulate neurotransmitters.
- Stimulate secretion of endorphins.
- Stimulate growth hormone production and receptivity.
- Improve digestive function.
- Improve hormonal balance.
- Reduce bacteria, fungus, and mold.
- Improve the secretion of IgA antibodies that fight Candida.
- Improve immune health and create a feeling of balance and well-being.

The Well color on this diffuser is available in Bronze, Item #3660; Silver, Item #3661; or Green, Item #3662

## **Aria Ultrasonic Diffuser**

Young Living's Aria™ Ultrasonic Diffuser is a unique, stylish way to bring the benefits of essential oils into your home or workplace. This system combines the latest in ultrasonic technology with a variety of useful features.

Item #4524

The included remote lets you choose from a selection of soothing, built-in sounds or enjoy the multicolored LED lights. With the built-in speakers, you can plug in your own personal music device and enjoy the music of your choice. The Aria is made of natural materials and boasts a built-in music system to increase its relaxing qualities.

The Aria's small ultrasonic plate vibrates over a million times per second vaporizing the water and oil to disperse into the air.

## **Home Diffuser**

Young Living's newly designed Home Diffuser combines a humidifier, air purifier, atomizer, and aromatherapy diffuser into one product that safely releases essential oils into the air to eliminate odors and create a spa-like atmosphere.

### **Primary Benefits**

- The ultrasonic frequency generates waves at 2.5 million times per second, releasing essential oil molecules into the air to help transform your surroundings and create a relaxing, spa-like atmosphere in your home or office.
- The ultrasonic technology gently disperses essential oils throughout the air to remove odors.
- The Home Diffuser helps replace harmful household chemicals with effective, all-natural essential oils.
- The constant, humidified air helps keep skin moisturized and feeling fresh.
- The diffused molecules cover 10 square meters.

Item #4589

### **TIPS:**

- Do not use more than one blend at a time in a diffuser as this may alter the smell and the therapeutic benefit. However, a single oil may be added to a blend when diffusing.
- Always wash the diffuser before using a different oil blend. Use alcohol, natural soap and warm water.

*My diffusers of choice are the TheraPro Premium diffuser or the Essential Oil diffuser with glass nebulizer as I have found them to work on all three levels for emotional, physical and mental.*

In dry areas the Aria Ultrasonic and Home Diffusers may help with adding humidity to your environment. Due to their releasing water beads, they may not be the best choice in humid climates.
